How to Identify VeriFone® Topaz™ and Ruby™ Cash Drawers

The Cash Drawers used with the VeriFone Topaz and Ruby Systems look nearly the same. The only difference is the connector. This makes it easy to misidentify them.

- A Topaz Cash Drawer will work on a Ruby system only with the addition of the VeriFone External Adapter – VeriFone # 22839-01 (PMP #45535).

- A Ruby Cash Drawer will not work on a Topaz system

The Identification Chart on the reverse side will help you order the correct VeriFone Cash Drawer for your application.

PMP#	OEM#	Description	
45526	P040-08-019	VeriFone Ruby Cash Drawer, Metal Front (older model)
