Upgrade of Clamshell-in-the-Pump Printers

OEM #889022-R01 to #889022-R02 Upgraded at No Charge

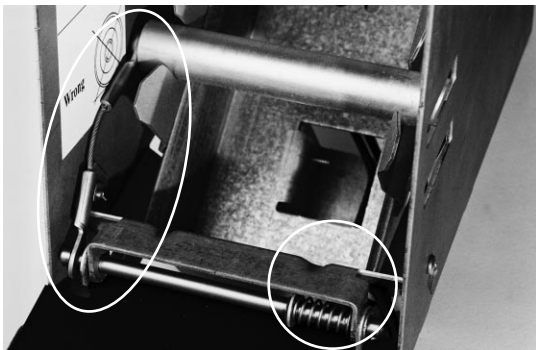

Upgrade of Paper Sensor

- Replace the optical sensor with a more reliable mechanical arm sensor.

Upgrade Printer Self-test

- An external self-test button is added which allows a self-test without opening printer door.

Upgrade Paper Tray

- Add paper mandrel and slotted paper tray. This reduces paper drag and helps reduce paper jams caused by paper looping.

Upgrade Hinge

- A better hinge mechanism is used to improve alignment of gears when door is closed. This greatly eliminates misalignment and potential damage of gears.

Products and services are available from distributors throughout the United States, Canada, Mexico and other countries around the world.

All manufacturers' numbers, names, trade names, trademarks and descriptions used here are for reference purpose only. None of the rebuilt items listed here are the products of the identified manufacturers.
