### How to Set Pricing of Mechanical Computers From \$2.000 to \$2.999 Per Gallon

Recently, fuel prices in the United States have begun to approach and exceed \$2.000/gallon. The following instructions explain how to set the price on mechanical computers above \$1.999/gallon.

The four most common computers in use today are the 2002, 2002E, 4203, and VR-10/4.

<u>Computer</u>	<u>Maximum Price Per Gallon Setting</u>
2002	\$1.999 (can be upgraded by PMP to price above \$2.000)
2002E and 4203	\$2.999 (\$3.999 with PMP kit #81010)
VR-10/4	\$3.999

#### Price Setting Instructions for 2002E and VR-10/4 Computers:

To move the price to the \$2.000 to \$2.999 range, access the back of the computer (the back is the side without the totalizers). Located on the right side of the back between the variator and counter is a flat metal lever extending out of the computer.

- 1) Remove and save the cotter pin which keeps the lever in place.
- 2) Lift the lever up slightly to clear the boss that positions the lever.
- 3) Slide the lever to the left until it reaches the "200" position.
- 4) Lower the lever onto the "200" position boss and reinstall the cotter pin.
- 5) Set the 10¢, 1¢, and 1/10¢ price range arms as desired.

\$1.000 to \$1.999 position  
2002E & VR-10/4

\$2.000 to \$2.999 position  
2002E & VR-10/4

## Price Setting Instructions for 4203 (2002E equivalent) Computers:

To move the price to the \$2.000 to \$2.999 range, access the back of the computer (the back is the side without the totalizers). Located on the right side of the back between the variator and counter is a flat metal lever extending out of the computer.

- 1) Remove and save the cotter pin which keeps the lever in place.
- 2) Lift the lever up slightly to clear the pin that positions the lever.
- 3) Slide the lever all the way to the left.
- 4) Lower the lever so that the locating pin is in the rightmost hole and reinstall the cotter pin.
- 5) Set the 10¢, 1¢, and 1/10¢ price range arms as desired.

\$1.000 to \$1.999 position  
4203

\$2.000 to \$2.999 position  
4203

## 2002 Computers can be upgraded by PMP

The older model 2002 computer, which prices up to only \$1.999 per gallon, can be upgraded to the PMP 4203 computer, which prices up to \$2.999 per gallon. The PMP 4203, like the 2002E, can also price up to \$3.999 per gallon with the use of PMP kit #81010.
