

# **Important Please read this**

## **RECOMMENDED FUEL FILTER**

**With each newly installed Ecometer, install a new 10-micron filter (gasoline) or 30-micron filter (diesel) as specified by the original equipment manufacturer. Debris ingested into the meter can cause premature failure. Also, do not “spin” the meter using compressed air.**

-----

## **BEWARE**

Federal Regulations are very stringent on handling and shipping of items that have been contaminated with flammable materials such as gasoline, diesel, jet fuel or kerosene.

## **THOROUGHLY DRAIN**

...each meter to ensure it does not contain any gasoline. Return the fluid drained from the valve to the tank that was supplying the dispenser. Engine oil may be used as a purging agent.

## **SEAL THE METER**

...using the included endcaps. If you need more endcaps, please call 1-800-243-6628.

## **ABSOLUTELY DO NOT SHIP METERS BY AIR**

Thank you for your help in keeping everyone's workplace safe and the environment clean.
